EGI Health: Smarter Networks for Better Healthcare
Helping Healthcare Systems Solve IT Problems

Healthcare organizations must keep up with expanding facilities, technology and growing compliance demands. Having a comprehensive and dependable IT infrastructure in place is no longer optional.

Cisco Catalyst Switches: Built with Healthcare in Mind

Using Cisco Catalyst switches, EGI Health helps healthcare organizations build, manage, and maintain IT systems designed with reliability, security, and flexibility required to keep critical operations running smoothly. Here's how:

- **Strong security and compliance:** Keep patient data safe with features that control access and separate network traffic. Simplify meeting HIPAA regulations and protecting sensitive information.

- **Reliability:** Crucial systems like electronic health records and lab equipment perform without disruption, reducing downtime and keeping patient care on track.

- **Ready to grow with your network:** Cisco Catalyst switches make adding devices and locations simple. Scaling is hassle-free, thanks to features like SD-Access.

- **Designed for healthcare applications:** Catalyst switches prioritize top applications and connect with IoT devices to improve data flow.

> *Using Cisco Catalyst switches, EGI Health helps healthcare organizations build, manage, and maintain IT systems designed to handle their specific needs.*

EGI Health Designs and Implements Healthcare IT Systems for:

- Streamlined IT operations through automation and centralized tools
- Improved security with simpler, standardized network setup
- More reliable networks with fewer interruptions to patient care
- Smooth onboarding of new facilities and technology
- Lower costs by upgrading to energy-saving hardware solutions.

EGI Health, a specialty practice of the Ergonomic Group (EGI), has 40+ years of experience delivering healthcare technology solutions. From data centers to bedside systems, our services are designed to meet the unique needs of healthcare providers.
